

## Morning Brief

Date/Time Stamp: Friday, Mar 29, 2024, 08:16

### Preparedness Levels

#### Northwest PL

Current	3-Day	10-Day
1 (10/13)	1 (10/10)	1 (10/10)

#### National PL

1 (10/12)

#### Northwest Historic PL

See [Preparedness Level](#) Product

#### Northwest IMT Rotation (3/26 – 4/9)

For additional IMT information refer to the [IMT Status/Rotation](#) page  
<https://gacc.nifc.gov/nwcc/content/products/intelligence/teams.pdf>

#### NW Area Complex Incident Management Teams (CIMT)

NW Team 2 - (Loomis)

NW Team 3 – (Click)

### Northwest Incident Activity

5 fires for 2 acres (3/22 – 3/28)

OR: 0 fires for 0 acres

WA: 5 fires for 2 acres

#### Large Fire Summary

New large incidents: 0

Reported incidents: 0 (OR: 0, WA: 0)

0 acres growth on existing incidents

#### Northwest IMT Activity

NIMOs committed: 0

Type 1 IMTs committed: 0

Type 2 IMTs committed: 0

Complex IMTs committed: 0

### National Fire Activity (IMSR 3/22 – 3/29)

Initial attack activity: Light (565 fires)

New large incidents: 37

Large fires contained: 42

Uncontained large fires: 13

#### National IMT Activity

Area Commands committed: 0

NIMOs committed: 0

Type 1 IMTs committed: 0

Type 2 IMTs committed: 0

Complex IMTs committed: 1

\*Nationally, there are zero fires being managed under a strategy other than full suppression

### Northwest Activity Summary

Warmer and drier temperatures over the past week allowed for an increase in the implementation of prescribed fire projects. Much of the snowpack in Oregon continues to hover around normal. Snowpack in Washington continues to be below normal especially the northern portion of the state. Initial attack activity remained minimal.

### Northwest Current Incident Details

*Incidents listed below meet large fire criteria and/or incidents with a Type 1 or 2 IMT assigned. Large incidents are defined as fires which are 100+ acres in timber or 300+ acres in grass/brush. For additional information on incidents no longer listed below please refer to the [Northwest Large Incident Summary](#) or [Northwest Fires Utilizing Other than Full Suppression Strategies](#)*

Incidents not Previously Reported: 0

Incidents Previously Reported: 0

### Northwest Fire Weather Summary

Showers over much of the region will diminish today as drier weather moves in from the north over the weekend. A warming trend will amplify day by day as temperatures rise above normal with the peak maximum temperatures coming on Tuesday. General winds will switch more to north to northeast. The next cold front arrives Wednesday with rain returning to the west side and windier conditions east of the Cascades.

See your local NWS forecasts for details.

### Northwest Fire Potential Summary

Lighter fuels will undergo significant drying over the weekend as the warming trend for the region sets up. Lowest fine dead fuel moisture is likely on Tuesday before the next cold front moves in on Wednesday. Opportunities for burning will arise for the next few days but windy conditions are expected with the cold front arrival on Wednesday.
