**Subject: List of Medical Equipment being accepted as donations to the Israeli hospital system**

Dear Sir / Madam,

In light of tragic events, the Israeli health system continues to provide care and is not currently experiencing acute supply shortages. With this in mind, those who would like to provide support may review the attached list of needs of the system. Thank you for your support.

Below is the list of needs of Israeli hospitals for preparedness for war.

We stress that all the equipment requires CE approvals: European, TGA (Australia), FDA (US) or HEALTH CANADA (Canada).

Medical equipment must be either 220V compatible (preferable) or come with a suitable converter. Any other equipment is not required.

For offers of assistance in manpower or medical personnel, please contact: [yoel.collick@moh.gov.il](mailto:yoel.collick@moh.gov.il).

Many thanks in advance and kind regards,

Ran Edelstein  
Manager, Logistics Department  
Emergency and Disaster Management Division
