

Supporting the Mental Health of Children Seeking Asylum in New York City

*For providers and the front-line
helpers who serve them*

Learn more at mentalhealth.cityofnewyork.us

Executive Summary

Asylum seekers continue to enter New York City in search of safety, freedom and opportunities. The humanitarian crisis is ongoing and unprecedented. City agencies along with faith communities, non-profit providers, volunteer and advocacy groups, and experts from different disciplines continue to tirelessly and compassionately contribute to the extensive relief efforts in support of these newest members of our City. To meet their unique needs, New York City offers a host of health and social services for asylum seeking families at emergency sites.

Impact of Asylum-Seeking Experience on Mental Health

Asylum seeking adults and children can face increased rates of depression, anxiety, and posttraumatic stress due to the impact of their journey including traumatic experiences of family separation, exposure to violence, and challenges faced in their new place of living. Addressing the mental health needs of families is highly critical during this time of transition and rebuilding, hence **integrating mental health services into the network of resources has been an integral part of the City's response.**

As helpers and providers who engage with asylum-seeking families in navigating New York City's complex social service system and providing care, **you are often the first point of contact for families new in the City.** Caregivers may openly express to you their emotional distress, or a need for guidance on how to help their children cope. Additionally, you may observe a family in need of support with mental health, even if they have not explicitly voiced their distress or concerns.

How To Use This Guide

This guide provides resources that you can use to enhance emotional health and wellness of asylum-seeking children and caregivers. These resources have been curated to ensure relevance, quality, and ease of access.

Having knowledge of common mental health challenges and guidance about ways to cope helps normalize asylum seekers' experiences and provides hope, an essential element of recovery from any traumatic experience. For some families who are experiencing severe distress, a referral to professional care is warranted.

This guide includes resources to::

- 1. Strengthen the mental health of children:** Increasing children’s coping skills, talking about mental health and strengthening bonding by doing positive activities together all help to nurture emotional and mental well-being. Building adult stress management skills and mental health knowledge also help caregivers expand upon the ways they support children.
- 2. Access mental health services:** Learning about the steps to take, and what to expect when a child, young person or caregiver needs professional mental health services, can make the referral process smoother.
- 3. Manage work related trauma and stress:** Listening to first-hand trauma experiences of children and family members can lead to stress and vicarious trauma symptoms in helpers. This can take an emotional toll, and affect life outside of work. Psychological First Aid and learning about how to manage work stress will help prevent burnout, maintain your capacity, and support your well-being.

Note: The enclosed guidance solely focuses on mental health for children and caregivers, and is not meant to be a comprehensive resource guide for all social service and mental health resources the City has to offer. Please refer to the [NYC Office of Asylum Seeker Operations](#) site for more resources.

Mental Health Resources Included In This Guide

-  **Social Emotional Learning (SEL) Resources For Caregivers And Service Providers**
SEL resources offer guidance for caregivers on how to strengthen the mental health of children and enhance the coping skills of children and caring adults.
-  **Information To Help Families Access Mental Health Services**
These resources help caregivers and helpers learn ways to access professional mental health services when needed.
-  **Guides For Managing Work Related Trauma And Stress**
These resources help front line helpers manage the high level of stress experienced when working with traumatized displaced populations.
-  **Up-To-Date Information on The City’s Emergency Response And Related Services**
The network of services for the asylum-seeking population is complex and everchanging. This resource allows helpers and asylum seekers stay up to date on all resources available.

My Resilience Workbook - Inner Space [English Only]

[Mi Libro de Actividades de Resiliencia - Espacio Interior](#) [En Espanol]

- Who: Children ages 5-10
- What: Workbook
- How: Printed or used digitally and provided directly to caregivers and families
- Credit: Written by Tzivy Reiter and Naomi Baum, Ohel Children's Home and Family Services (shared with permission from the authors)

INNER SPACE, for parents, helps children ages 5-10 explore feelings and cope with adversity and hard times. Caregivers can use this playful tool together with their child(ren).

Learning what to expect from children who have experienced trauma [English]

[Cómo entender el trauma](#) [En Espanol]

- Who: Children of all ages
- What: Flyer
- How: Printed or used digitally and provided directly to caregivers and families
- Credit: The National Child Traumatic Stress Network

This guide educates caregivers about the range of emotional and behavioral changes their children may experience during their asylumseeking journey and includes helpful tips for families reuniting after a period of separation.

Talking to young children when violence happens [English]

[Hablando con los Niños Cuando Sucede La Violencia](#) [En Espanol]

- Who: Children up to age 10
- What: Tips
- How: Printed or used digitally and provided directly to caregivers and families
- Credit: Center for Resilience + Well Being in Schools

When young children go through something scary, they look to adults for comfort. This guide helps caregivers respond to their children's needs in times of adversity and uncertainty to help them feel safe and secure.

[Talking to teens when violence happens](#) [English]

[Hablano con los Adolescentes Cuando Sucede la Violencia](#) [En Español]

- Who: Children ages 11 and older, anyone who works with youth
- What: Toolkit
- How: Children ages 11 and older, anyone who works with youth
- Credit: Center for Resilience + Well Being in Schools

Teens look to adults for comfort and clarification about what happened when they experience something scary, whether they express explicitly or not. This guide provides caregivers step-by-step guidance on framing conversations to help teens feel safe.

[Talking to young people about their mental health](#) [English]

- Who: Children ages 11 and older, anyone who works with youth
- What: Toolkit
- How: Children ages 11 and older, anyone who works with youth
- Credit: Mayor's Office of Community Mental Health

As adults who care for and work with young people, you may be among the first people to notice concerning changes in behavior or emotional wellbeing. If you do, it's time to start a conversation. Use these five steps to learn to talk with young people about their mental health, maintain privacy, build trust, and make connections to mental health providers.

[Tips for healing after disasters](#) [English]

- Who: Any caregiver or anyone who works with youth
- What: Tips
- How: Print in its entirety or in part or provide directly to caregivers
- Credit: Psychological First Aid

This psychological first aid comprehensive guide helps caregivers and providers cope with traumatic circumstances. It includes parent tips for how to help children at different developmental stages cope.

[Creating soothing environments for family](#) [English]

[Creando Ambientes de Apoyo Cuando Suceden Hechos Alarmantes](#) [En Español]

- Who: Any caregiver or anyone who works with youth
- What: Tips
- How: Any caregiver or anyone who works with youth
- Credit: Center for Resilience + Well Being in Schools

Building routines, rituals, and rhythm into your home life restores a sense of safety. The tips in this guide help survivors understand how to create an environment conducive to restoring calm on the inside by structuring what's outside.

Help for Caregivers and Pregnant People

[Simple Activities for Children and Adolescents](#) [English]

[Actividades sencillas para niños y adolescentes](#) [En Español]

- Who: Any caregiver or anyone who works with youth of all ages
- What: Activity Ideas
- How: This resource can be printed and provided directly to caregivers
- Credit: The National Child Traumatic Stress Network

Recognizing play as an important way young children learn and maintain a sense of wellbeing, this guide lists activities that can be enjoyed by parents and children together. These activities can enhance the bonds between caregivers and children which is effective with boosting mental health. Activities here do not need a lot of prep time or resources and are helpful to parents looking for novel ways to distract young children.

[Practicing healthy coping for caregivers](#) [English]

[Prácticas para el Bienestar: Breves Recordatorios para Tiempos de Estrés](#) [En Español]

- Who: Any caregiver or anyone who works with youth of all ages
- What: Tips
- How: This resource can be printed and posted. It can also be provided directly to caregivers of children of all ages.
- Credit: Center for Resilience + Well Being in Schools

This short list of well-being practices and gentle reminders for times of stress describes actions that caregivers can take to immediately reduce the body's stress response and restore calm.

[Help for People who are Pregnant or who Have Recently Given Birth](#) [English]

Updates to the City's Emergency Response

The NYC Office of Asylum Seeker Operations (OASO) work recognizes the city's response to the emerging asylum seekers' migration from international borders to our city. Created in March 2023, OASO is primarily responsible for overseeing and coordinating all support services for asylum seekers and their families.

About The Mayor's Office of Community Mental Health (OCMH):

The Mayor's Office of Community Mental Health is committed to improving mental health outcomes for all New Yorkers, so that more people can get the mental health support they need to live healthy and content lives. We work with City agencies to reduce barriers to mental health care for underserved communities. Our priorities are rooted in equity, racial justice, and cultural responsiveness. We adopt a community-centered and strength-based approach that recognizes diverse perspectives, lived experiences, resilience, and the unique needs of New Yorkers.
