

# Paid Leave Means A Stronger Delaware

FEBRUARY 2023

**Delaware is home to the twelfth state paid family and medical leave program in the United States.** Delaware's plan, which will go fully into effect in 2026, marks an important step forward for the state, ensuring most workers at large and mid-sized employers, as well as self-employed workers, can access paid leave. The program will form a strong base to expand upon to cover all workers in coming years.

**Delawareans have work and family responsibilities. Paid leave means no longer having to choose between job and family.**

People in  
Delaware both  
work and provide  
care

- ▶ Nearly 10,500 children are born in Delaware each year, and in 72 percent of all Delaware households with children – nearly 141,000 homes – all parents have paying jobs.<sup>1</sup>
- ▶ Women's wages support their households. In Delaware, 77 percent of Black mothers, 53 percent of white mothers, 44 percent of Latina mothers and 37 of AAPI mothers are key family breadwinners. State-level data is limited, but nationally 64 percent of Native American mothers are breadwinners.<sup>2</sup>
- ▶ Women make up nearly half of Delaware's labor force (49 percent) and more than one-quarter of its business owners (26 percent).<sup>3</sup>
- ▶ Across the country, many men want to play a larger role in caring for their children, but unsupportive policies and stigma hold them back.<sup>4</sup>

**Delaware families' care needs are increasing. Paid leave means older adults and people with disabilities can provide and receive care, and our care workforce is more resilient.**

- ▶ Older workers and older adults are more likely to experience serious medical conditions that require care.<sup>5</sup>
- ▶ In Delaware, more than one-quarter of workers are 55 and older,<sup>6</sup> and in the next 20 years, the share of the state's population age 65 and older will grow by about seven percent.<sup>7</sup>
- ▶ Paid leave reduces nursing home utilization and can help recruitment and retention of care workers.<sup>8</sup>
- ▶ About 52,000 Delaware residents report having long-term COVID-19 symptoms that affect their daily activities.<sup>9</sup> Paid leave helps family caregivers and people with disabilities (who are often caregivers

The state's  
caregiving needs  
are significant,  
and growing

themselves) manage their health and care needs while maintaining their income and employment.<sup>10</sup>

**Delaware will soon see the benefits of paid leave for workers, families and businesses. Paid leave means people – especially women – aren't forced to leave the labor force to care for their families or health, reducing turnover for employers of all sizes and boosting the economy.**

**Delaware's  
paid leave program  
will help tens of  
thousands**

- ▶ Paid leave helps improve health outcomes and helps working people remain economically secure and stay connected to their jobs.<sup>11</sup>
- ▶ Businesses' employee retention can also improve significantly with paid leave, helping to strengthen bottom lines.<sup>12</sup>
- ▶ State programs are used as intended by workers without overburdening employers.<sup>13</sup>

**Delaware will soon add to the growing body of evidence that paid leave programs work – a common sense, tested approach that works for families, businesses and economies.**

But people's access to paid leave shouldn't depend on where they live or work or what job they hold. The United States needs a common sense, national paid leave program that:

- ▶ includes all workers, no matter where they live or work or what kind of job they have;
- ▶ replaces enough income that workers at any income level can afford leave;
- ▶ provides enough time for workers to meet their care and health needs;
- ▶ covers the range of major needs workers face, including addressing their own health conditions, caring for seriously ill, injured or disabled family members and welcoming newborn, newly adopted or foster children;
- ▶ provides education and outreach to ease implementation for workers and small businesses;
- ▶ has a sustainable funding source that is affordable for workers, employers and the government without harming other essential programs, such as Social Security or the Child Tax Credit.

**A national paid  
leave plan is  
the solution**

**National paid family and medical leave means a stronger economy, healthier families and businesses, and greater equality for all women and families.**
